

1. Feature Overview: Bidding System

The bidding system allows sellers to list items for auction, and buyers to place bids within a defined time frame. Once the auction ends, the highest bidder wins. Admins oversee all activities.

2. User Roles & Screen List

A. Buyer Screens

1. Browse Auctions Screen

- Filter by categories, price, time left, location
- Sort by newest, ending soon, highest/lowest bids

2. Auction Detail Page

- Item images, description
- Current bid
- Time remaining (Realtime countdown)
- Seller profile
- Bid history
- "Place Bid" button
- Buy Now option (if enabled)

3. Place Bid Screen (Modal or Inline)

- Enter bid amount
- Auto-bid toggle (optional)
- Confirm bid button
- Show minimum next bid requirement

4. My Bids / Watchlist

- Track active and past bids
- Bid status (winning/losing/won/lost)
- Notifications for outbid, auction ending, won, etc.

5. Checkout / Payment

- Triggered if buyer wins
- Payment options (linked wallet, PayPal, card, Lengo Lingo (M-Pesa))
- Shipping details

6. Bid Success / Summary

- Confirmation screen with details of winning bid
 - Option to message seller or view order status
-

B. Seller Screens

1. Create Auction

- Upload product images
- Title, description, category
- Starting price
- Reserve price (optional)
- Buy Now price (optional)
- Auction duration (e.g., 1 day – 14 days)
- Shipping info

2. Manage My Listings

- View all active, ended, scheduled auctions
- Edit, pause, or delete auction (if no bids yet)
- See current highest bid and time left

3. Auction Detail (Seller View)

- Bids received
- Bidder profiles
- Finalize deal if auction ends
- Message winning bidder

4. Post-Auction Management

- Mark item as sold
- Mark item as shipped
- View payment confirmation
- Rate buyer

3. Optional Features to Consider

- **Auto-Bid Feature:** User sets max bid, system auto-bids until limit is reached
- **Verified Sellers:** Badge for trusted sellers
- **Auction Extensions:** Extends time if bids are placed near end (anti-sniping)
- **Bid History Transparency:** Optionally anonymized for privacy

Buyer Settings Interface (with Social + Marketplace)

1. Profile Settings

- Edit username, profile photo, display name, bio
- Add cover photo/banner
- Pronouns and visibility settings
- Social links (Instagram, LinkedIn, etc.)
- View public profile preview

2. Social Activity Settings

- Post visibility: public / followers only / private
- Tag settings: allow/disallow tags
- Comment moderation:
 - Auto-filter offensive words
 - Who can comment: everyone / followers / no one
- Story settings:
 - Who can view
 - Allow replies: everyone / followers / off
- Blocked users list

3. Bidding & Auction Settings

- Auto-bid configuration
- Default bid increment settings (if customizable)
- Turn on/off bid confirmation prompts
- Notifications for:
 - Outbid alerts
 - Auctions won
 - Watched items updates

◆ 4. Marketplace Activity

- View purchase history
- Saved auctions / Watchlist
- Shipping address management
- Linked payment methods
- Refund/return request center

◆ 5. Notifications

- Toggle alerts for:
 - Likes/comments/follows
 - New posts from followed sellers
 - Auction updates

◆ 6. Security & Privacy

- Two-factor authentication
- Change email/password
- Device & login activity log
- Post, profile, and auction visibility controls
- Disable or delete account

Seller Settings Interface (with Social + Marketplace)

◆ 1. Profile & Store Settings

- Public store name & handle
- Store banner and description
- Verified badge status (e.g., "Top Seller", "Verified Business")
- Social link buttons
- Show/hide store feedback

◆ 2. Social Engagement Controls

- Cross-post products to personal feed or story
- Allow DM inquiries
- Live selling preferences (if using live auctions)
- Promote listings via sponsored posts (optional)

◆ 3. Auction & Listing Preferences

- Default auction settings (duration, reserve price, Buy Now)
- Category defaults
- Shipping profiles
- Enable "bundle listings" or offers
- Set return/refund policies

◆ 4. Order Management

- Sold items list
- Shipment tracking updates
- Buyer communication history
- Auto-responder for post-sale messages

◆ 5. Payments & Payouts

- Link bank accounts / wallets
- Earnings summary
- Payout schedule settings
- Sales report downloads

◆ 6. Notifications

- Alerts for:
 - New bids / Auction ending soon
 - Comments on listings
 - Follows/messages

- Items sold or shipped
- Custom notification tones (if in-app sounds are used)

◆ 7. Privacy & Security

- Profile visibility (public / buyers only)
 - Story & content privacy
 - Manage followers/blocklist
 - Login activity logs
 - Account deactivation / business pause option
-

🔧 Universal Settings (Both Buyer & Seller Can Access)

- Language & localization
 - Theme mode (dark/light/system)
 - Push/email notification preferences
 - Data export & GDPR compliance
 - Help center / FAQ access
 - Contact support / Report an issue
-

✅ Example Use Cases Enabled by These Settings:

- A **seller** can promote a product auction on their story, then manage bids in the same interface.
 - A **buyer** can hide their bidding activity while remaining active in the social feed.
 - Users can toggle visibility of personal posts vs. commercial (store) content.
 - Admin can tailor permissions for sellers with higher reputation scores (e.g., unlock sponsored posts or live auctions).
-

Admin Interface – Settings & Controls for ALSE

1. Platform Dashboard Settings

- **Analytics Preferences**
 - Toggle dashboard modules (auctions, social, users, revenue)
 - Set default timeframe (daily, weekly, monthly)
 - Export reports (PDF/CSV)
 - **Theme & Appearance (Admin Panel Only)**
 - Light/dark mode
 - Custom admin panel layout
 - Enable quick access widgets (e.g., “Flagged Content”, “Top Sellers”)
-

2. User Management Settings

- **User Role Control**
 - Add/edit roles: Buyer, Seller, Moderator, Admin, Support Agent
 - Set role-based permissions
- **User Behavior Settings**
 - Define strike thresholds (e.g., 3 content flags = auto-suspension)
 - Shill bidding detection toggles and parameters
 - Auto-ban settings for hate speech or spam
- **Verification Rules**
 - Set requirements for seller verification (ID, tax ID, etc.)
 - Enable auto-verification or require manual review

3. Marketplace & Bidding Settings

- **Auction Configuration**
 - Max/Min auction duration
 - Enable/disable Buy Now option globally
 - Reserve price toggle
 - Auto-extend last-minute bidding (anti-sniping feature)
- **Commission Settings**
 - Set platform commission rate per category or globally
 - Define payment flow (escrow, instant payout, etc.)
- **Bid Limits**
 - Set daily bid limits per user type
 - Auto-bid rules and cap
- **Featured Listings**
 - Enable/disable paid featured spots
 - Price and approval workflow

4. Social Media Moderation Settings

- **Content Control**
 - Toggle AI/moderator-assisted content scanning
 - Set sensitivity level for nudity, hate speech, or spam detection
 - Define post types allowed (text, image, video, polls, lives)
- **Privacy Control Defaults**
 - Default post visibility: public / friends only / custom
 - Story duration limits
 - Tagging controls (who can tag, moderation required, etc.)

- **Reporting System**
 - Auto-action on repeated post reports
 - Custom report categories
-

5. Admin Tools & Utilities

- **Manual Moderation Tools**
 - Approve/reject flagged posts or users
 - Directly suspend or delete users
 - Shadowban (user can post but others don't see it)
 - **Admin Messaging**
 - Broadcast message to:
 - All users
 - Only buyers/sellers
 - Affected users (e.g., system outage)
 - **Dispute Management Tools**
 - View dispute queue
 - Assign disputes to agents
 - Mark dispute as resolved
 - Partial refund triggers
-

6. Security & Access Control

- **Admin Access Logs**
 - View activity logs by admin account
 - Location, IP, time, action taken
- **Role-based Access Control (RBAC)**
 - Set access rules per admin type (full admin, content mod, finance, etc.)

- **Two-Factor Auth Settings**
 - Force-enable 2FA for all users or roles
 - **Fraud Detection Settings**
 - Configure bidding anomaly rules
 - IP rate limiting
 - Identity fraud monitoring (KYC check integrations)
-

7. Analytics & Reports

- **Usage Reports**
 - DAU/MAU, bounce rates, time on platform
 - **Marketplace Reports**
 - Active listings, average bid amount, top sellers
 - **Social Trends**
 - Most engaged posts, follower growth
 - **Revenue Dashboard**
 - Commissions, payouts, refunds, marketing spend
-

8. Platform-Wide Configuration

- **Terms & Policies**
 - Update ToS, privacy policy, seller guidelines
 - Attach multi-language support
- **Language & Localization**
 - Add/remove supported languages (e.g., English, Swahili, Chinese)
 - Set default locale
- **Notifications Control**
 - Customize in-app/push/email templates

- Schedule maintenance alerts
- **Feature Toggles**
 - Enable/disable features like:
 - Live selling
 - Auto-bidding
 - Social polls
 - Marketplace access for new users

Summary of Admin Interface Sections:

Section	Purpose
Dashboard	Quick view of platform stats and actions
User Management	Control user roles, bans, and verification
Bidding & Auctions	Set rules for auctions, commissions, and bids
Social Moderation	Handle flagged content, privacy defaults, and engagement settings
Tools & Moderation	Take manual action on users, listings, or posts
Security & Permissions	Manage admin access, fraud detection, 2FA
Reports & Analytics	Get insight into platform usage, sales, and social activity
Platform Settings	Configure ToS, notifications, supported languages, etc.
